Reduce your bottom line with clean energy technical services

Flexible Technical Assistance (FlexTech) offers a wide range of cost-shared technical services to help you and your team make cost effective clean energy decisions. Leverage these services at a reduced cost and prioritize energy efficiency into future capital planning projects. NYSERDA will share the cost of most eligible FlexTech studies for select technical services, up to \$500,000 for most Commercial, Industrial, or Multifamily customers.

The following technical services may be eligible for cost-share:

- Energy feasibility studies
- Energy master planning
- Industrial and process efficiency
- Data center efficiency
- Clean heating and cooling
- Retro commissioning
- Carbon mitigation studies

Use our energy consultants... or your own

The first step in reaping the rewards of FlexTech is to select a consultant or service provider that suits your needs. NYSERDA can provide a list of approved FlexTech Consultants that possess a wide range of expertise and help you select a consultant based on your energy goals and objectives. FlexTech Consultants can prepare a program application on your behalf, resulting in minimal effort on your part. Want to use your own consultant? No problem. Just work with your consultant to submit a signed application, scope of work, and budget.
