Dear Sir,

In response to your wood burning issue I'd like to tell you how hard and expensive it would be to give up heating with firewood. I'm on social security, have a small home heat with wood when it's extremely cold.

Most people burn the least they can. I can't afford other heat sources & would never ask for assistance. My wood is from dead & down trees. I'm sure a lot of people do the same as I. The idea of not heating with wood sounds terrible. The heat is wonderful.

Please don't take wood heat away from us. I've had my wood stove for years, can't afford other heating methods.

Thank you

Sincerely,
To Peter Coffeen
