

To Whom it May Concern,

My name is Helga Closson. I'm 77 yrs old and even with "Heag" I am in debt to my Gas company thanks to the stupid Green program. This program is causing more harm than good. Our beautiful farmland is disappearing because of Chinese solar panels. What if we run out of farmland then what, we starve or go without for a bunch of fools who never took any of the problems being caused by this harmful program. We are making ourselves totally dependant on a communist country for our power medicine, car parts etc. What if they refuse to send solar panel parts then what? Why deal with communists when we should be making our part in our country that goes for the medicine they & India are making. We need our trees that are being cut down for wind power & solar panels when we need the trees & farmer in order to live! If you want to clean up the air go after Japan, China, & India the dirtiest & most polluting countries in the world. Air moves & we get fallout here for the filth there!

I am not able to afford much of anything or Social Security and ~~so~~ many others like we are suffering because of inflation, high or lack of food gas taxes etc. Stop killing the Citizens of the USA for a [redacted] program that was forced upon us that is not the American Way is a Communist way! Also you are putting many farmers & others out of work & all the illegals brought over here need food etc. Stop the crap & think of all

The damage you are doing to our country  
& its legal citizens who pay your salaries;  
No more solar & no more Windmills in our  
area to send to NY city power guzzlers!

Stop being Nazis leave our land alone  
& do for the people not for yourselves before  
this beautiful farming area is no more  
then what? You can't heat solar panel! May  
you should!

Helga Closson

my son - J. Kurt Closson
