NYSERDA
Draft Scoping Plan Comments
17 Columbia Circle
Albany NY 12203-6399

Dear Folks:

I am writing to encourage the Climate Action Council to propose a plan that will enact rapid, transformative changes to shift our economy off fossil fuels so our children and descendants can have a future that is both restorative to the environment and economically just for our disadvantaged communities.

This plan must rely on proven zero-emission technologies to generate electricity such as solar PV and wind turbines. The plan must facilitate rapid electrification of transportation and buildings, and it must provide for legal enforcement provisions that will be timely and effective deterrents to non-compliance.

Thank you for your work on this important effort.

Sincerely,

Amy Lauterbach Pokorny
