To Whom It May Concern:

As a New York State Resident, taxpayer; I wanted to express my opinion on the NYS Climate Action Council in reference to the Climate Leadership Community Protection Act. My family is very supportive in protecting and maintaining New York State's environment for the better of climate; however, this council and agenda should be low priority at this time, our tax dollars should be spent on more urgent causes; there are much more important crisis that should be high priority. New York State; as well as the entire Country is currently in a state of emergency; a complete mess!

Most important, when will our NYS Government; Kathy Hochul, be held accountable for not doing their jobs, certainly not working for New Yorkers. Why is she allowed to violate our constitutional rights with useless masks for our disabled adults, taking away from their freedom of choice. Allowing illegal immigrants into NYS instead of helping New Yorkers who are in crisis, cannot afford to pay bill or buy food for their families? She continues to destroy small businesses (continued with Andy's corrupt agenda), elevated crime, experimental vaccines for children, crumbling healthcare system, broken educational system, making sure we have voter integrity laws by required ID; but instead, she is trying to allocate taxpayer dollars to build a new Buffalo Bills Stadium? What is wrong with the old stadium? Why isn't the corrupt NFL financing, not the NYS taxpayers? Most New Yorkers could care less about overpaid professional athletes/sports, especially when we are just trying to make ends meet financially.

Therefore, as a NYS taxpayer, I am very against climate change proposals. If circumstances should change drastically for the better, in the future; I would be open to support cost analysis and true science from environmental and biologist experts/scientists (not the clowns in Albany), showing the pros and cons on elimination of fossil fuels, gas appliances, and gas automobiles. Will NYS Government in Albany buy me a new electric vehicle? Will I even live to see benefits from electric vs. gas? What about the disposal of the batteries and old rusty windmills, wouldn't that affect climate change? How about those solar farms that look like shit, ruining good farmland that could be otherwise used for farming for a community food bank to feed the hungry?

The Democratic/radical left loves to hear themselves talk, while saying nothing and showing no scientific statistics/facts to back their agenda. Why do our politicians continue to travel by private jet and why haven't they produced, to the American people, science experts? Rules for thee but not for me! This council must think New Yorkers are stupid.

The United States is VERY rich in natural resources; such as gas/oil, which regenerates, there is enough oil for 100s of years. Why are the oil rigs still off our coasts, if there was no oil, they wouldn't continue to pump, correct? Do you know how much money our corrupt government has spent on underground tunnel (Dumps). The tunnels are throughout the U.S. which more efficient transportation underground than the hardworking taxpayers have above. Do your research and wake up! The entire climate agenda is a fraud/scam, money laundering pyramid scheme! Follow the connections and the money, government has been lying and brainwashing generations for 50 plus years on climate change.

The truth is the resident in office (illegitimate president) combined with NYS government are pushing their radical and communist agendas; stolen 2020 election, promote a one world order, federalize police, open borders to blend the population, delete our history, NYS late term abortions (crimes against humanity), strip away our constitution and our constitutional rights, create a crisis to take our guns away so we are left helpless, and control our energy and food supply, depopulation. All lies will be revealed!

Sincerely,

Anita Cowles
