To: Draft Scoping Plan Comments

This letter is in reference to the public comment portion of the Scoping Plan. I strongly believe that there needs to be an extension concerning comments. In addition to all the well presented reasons given by the Madison County Board of Supervisors, the public needs to know more + have a better explanation of how it will affect them. Full disclosure as to the affects, including negative outcomes, needs to be explained. How will solar panels affect the wells of the surrounding properties? (I received a survey asking for information about my well from the solar panel company - why?) What impact will the removal of all this land have on taxes?

I hope the public comment will be extended.

Sincerely,

Evelyn Lutness - Madison County, Town of Fenner Resident
