<b>Comment (2000 characters maximum)</b>	<p>Natural gas is clean, efficient, abundant, and affordable. Almost every home and business in New York State uses natural gas.</p> <p>How irresponsible it is, to even think about shutting down or reducing our natural gas supply. People can't just up and stop living!</p> <p>What right do politicians have to change our lives, and force unwanted laws down our throats! It's unconscionable!</p> <p>Our homes and businesses would become useless and unaffordable.</p> <p>This for sure shows how out of touch and dysfunctional our state government has become.</p> <p>This plan would destroy our quality of life, and our futures. I'm all for saving the planet, but New Yorker's alone can't do it.</p> <p>Wake up and face this reality! Bad things happen when ignorant and condescending politicians try to run people's lives.</p>
