April 1, 2022

To: CAC

I am opposed to the Draft Plan of the CAC has released for greenhouse gas emissions reduction and zero-emmissions reduction and zero. emissions power generation requirements. People should have a choice as to how they should spend their energy dollar.

This is an attempt to implement an authoritarian! What this is really succeding in doing is reducing freedom. Zero carbon is a myth. All zero carbon implementation have massive carbon producing cost and in many cases reduce the quality of life and standard of living.
