

Overall Energy & Fuels Markets Summary

- Summary of average spot prices for the following fuels (see page 1).
 - Crude oil (Brent and WTI), propane (Mt. Belvieu), and natural gas (Henry Hub) average spot prices all decreased slightly compared to the prior week.
- Regional fuels inventories (see pages 2 and 3) compared to the previous week:
 - Natural gas East Region inventories increased slightly compared to the prior week and are approximately 10% greater than the five-year average.
 - Ultra-low sulfur diesel (ULSD) and propane inventories decreased compared to the prior week.
 - Total gasoline inventories increased compared to the prior week.
- Market influencers include:
 - Global factors such as the continued conflicts in the Middle East, Russia-Ukraine war, and associated geopolitical uncertainties.
 - Domestic factors such as high natural gas storage levels, and economic concerns related to inflation-control measures.
- In New York, the National Oceanic and Atmospheric Administration (NOAA) forecasts indicate leaning below average temperatures for the 6 -10 day outlook and near normal to leaning below average temperatures for the 8-14 day period. The NOAA forecasts for precipitation indicate near normal to leaning above for the 6-10 day and 8-14 day periods. (Page 6)
- NY retail prices (see pages 4 and 5) for heating and transportation fuels:
 - NY transportation regular gasoline and diesel both slightly decreased compared to the prior week.
