

## Overall Energy & Fuels Markets Summary

- Summary of average spot prices for the following fuels (see page 1).
  - Crude oil (Brent and WTI), Propane (Mt. Belvieu), and Natural gas (Henry Hub) average spot prices all increased compared to the prior week.
- Regional fuels inventories (see pages 2 and 3) compared to the previous week:
  - Total gasoline, natural gas, and Ultra-low sulfur diesel (ULSD) inventories increased while propane inventories slightly decreased compared to the prior week.
- Market influencers include:
  - Global factors such as petroleum oversupply concerns, continued conflicts in the Middle East, Russia-Ukraine war, and associated geopolitical uncertainties.
  - Domestic factors such as the seasonal demand change from summer to fall for transportation fuels as well as the recent interest rate drop are influencing prices and inventories.
- In New York, the National Oceanic and Atmospheric Administration (NOAA) forecasts indicate leaning above average temperatures for the 6-10 day and 8-14 day periods. The NOAA forecasts for precipitation indicate leaning above to near normal for the 6-10 day period and near normal to leaning above for the 8-14 day period. (Page 6)
- NY retail prices (see pages 4 and 5) for heating and transportation fuels:
  - NY transportation regular gasoline and diesel both slightly decreased compared to the prior week.
  - Heating oil and kerosene prices slightly decreased while propane slightly increased compared to the prior week.
